FACILITIES, INDOOR.

(c) lighting. indoor housing facilities shall have ample lighting, by natural or artificial means, or both, of good quality, distribution, and duration as appropriate for the species involved. such lighting shall be uniformly distributed and of sufficient intensity to permit routine inspection and cleaning. lighting of primary enclosures shall be designed to protect the animals from excessive illumination.

The lighting in the off exhibit quarters housing the young caracal, bobcat, red fox, and tiger needs to be increased and set to a time regime that provides a lighting exposure more closely approaching natural outdoor light cycles.

There needs to be routine checks in place that assures these animals have natural or artificial lighting giving them a more normal diurnal cycle and to provide lighting for inspections of the facility.
